*All data from UNESCO Institute of Statistics, 2017*

- Female graduates from tertiary education (1999) (UNESCO Institute of Statistics, 2015): 44.1%
- Female students enrolled in engineering, construction and manufacturing tertiary education programs: Insufficient data
Gender Country Profile

Nigeria

Economic Activity
- Males over 15 who are active in the labour force (2014) (UN Data, 2017): 63.8%
- Females over 15 who are active in the labour force (2014) (UN Data, 2017): 48.3%
- Proportion of adults (15 years and older) with an account at a bank or other financial institution, or with a money mobile service provider (2014) (UN Statistics, 2017): 51.46%

Decision-Making
- Proportion of seats held by women in National Parliament (2016) (World Bank, 2017): 6%

Human Rights
- Females married before 18 (2016) (UNICEF, 2016a): 43%
- Women subjected to physical/sexual violence by an intimate partner during their lifetime (UN Women, 2014): 16%
- Women subjected to physical/sexual violence by an intimate partner or a non-partner in the last 12 months (UN Women, 2014): 11%

Gender and Development Trends in Nigeria

Health
In 2015, approximately 60% of new HIV infections in Western and Central Africa, occurred in Nigeria (AVERT, 2016). According to AVERT, young women have a higher HIV prevalence and are infected earlier in life than men of the same age group. In 2013, more than 34,700 young women were infected with HIV compared to 19,900 young men (AVERT, 2016).

There is also a high prevalence of TB in Nigeria, with a range of 340, 000 - 880,000 deaths recorded in 2013 (World Health Organisation, 2014). Though most TB deaths occur amongst men, it ranked among the top five killers of women in 2014 (WHO, 2015).

Education
A British Council report notes that as of 2014, one-third of all girls were out-of-school in Nigeria, amounting to over 5.5 million school-age girls who did not attend school (British Council, 2014, p. 20). The same report indicates that Nigeria has made little progress in universal access to primary schooling and that on average, girls are less likely to attend primary schools than boys (British Council, 2014).
Gender Country Profile

Nigeria

In April 2014, 276 female students were kidnapped by extremist Islamic terrorist organisation Boko Haram, from a school in Chibok province, in North-Eastern Nigeria (United Nations Secretary General, 2015). Boko Haram remains a threat to the lives of civilians in the region and poses a particular risk to the safety and security of girls being educated in the area (UNGEI, n.d.).

Economy
Approximately 70% of Nigerians live below the poverty line, with women constituting 80 percent of that group (UN Women, 2017). About 54 million women live in rural areas, working predominantly in the agricultural sector (UN Women, 2017).

There are currently 8.9 million food insecure people in Nigeria, with 50,000 at risk of famine (OECD, 2017). Approximately 40,000 more Nigerians face the threat of famine, mostly in Borno State (OECD, 2017). Food and water insecurity heightens pre-existing dangers to women in affected areas, who may experience sexual abuse and exploitation, and attacks during a daily search for food and water (UNHCR, 2017).

Governance
Female candidates in Nigeria fared poorly in the country’s general election in 2011; 32 women were elected to national parliament out of 469 members, equating to approximately 8% representation (UNDP, 2017).

A 2017 UN Women report found that only 30% women occupy top public sector managerial positions. Most women are relegated to poorly-paid jobs performed under precarious conditions (UN Women, 2017).

Human Rights
Women in the north-eastern region of Nigeria face continued instability and threats to their security. A human rights report by the U.S. Department of State, found (in nearly half of all the areas surveyed in the northeast of the country), incidents of rape of women and girls in their camps and communities (U.S. Department of State, 2016).

There is no comprehensive law in Nigeria for combatting violence against women. Rape remains widespread, as does domestic violence (U.S. Department of State, 2016).

According to a UNICEF 2016 report, 25% of women in Nigeria aged 15-49 years had undergone female genital mutilation/cutting (FGM/C) (UNICEF, 2016b).
Gender Country Profile

Nigeria

Nigeria SDG Progress Profile

Sustainable Development Goals (SDGs): General

- Nigeria is currently ranked 141st for overall performance under the SDGs, with a median rank of 148th.

SDG 4: Achieve universal access to affordable and quality education at all levels. (Data retrieved from SDG indicator profiles, 2016)

- Expected years of schooling (years): 9 (major challenges must be overcome)
- Literacy rate of 15-24 years old (%): 66.4 (major challenges must be overcome)
- Net primary school enrolment rate (%): 63.9 (major challenges must be overcome)

Nigeria has signed up to a large number of education expenditure targets – for example the 23% UNESCO education target, the Abuja Declaration target of 15% on healthcare and the 10% agricultural target in the Maputo Declaration (UNDP, 2015). However, Nigeria’s performance under these targets have suffered, which a UNDP document has deemed a result of “poor implementation, opaque budgets and differential responsibilities across the three tiers have hampered progress in scaling-up investments” (UNDP, 2015, p. 14).

SDG 5: Achieve gender equality, protect and empower women, the youth and persons in vulnerable situations.
(Data retrieved from SDG indicator profiles, 2016)

- Women in National Parliaments (%): 5.6 (major challenges must be overcome)
- Female years of schooling (% male): 68.8 (major challenges must be overcome)
- Female labor force participation (% male): Insufficient data
- Unmet demand for contraceptives (%): 71.5 (major challenges must be overcome)

Despite the identification of women as key stakeholders in sustainable development Nigeria’s targets on the SDGs are particularly problematic in relation to gender equality, gender presence in government, and integration of women into the labour force (UNDP, 2015).

To strengthen the presence of women in government, UNDP has implemented a five-year, US$80 million initiative in Nigeria to consolidate and strengthen its democracy. As a result of the project, 2,043 female politicians and candidates have been trained in how to engage in electoral processes at the national and state levels (UNDP, 2017).
