

ADDENDUM

DIGITAL IMAGING COURSE

Topic	YouTube link	QR Code
Topic 1 – Introduction to Digital Imaging	https://youtu.be/KvnUyfA0rcg	
Overview of the video: A brief on the concept of digital imaging that discusses about the basic knowledge of the tools and devices that involves in digital imaging. Brief the differentiation between raster and vector images that suits to implement with and also focuses the use of the computers as a tool for creating digital images and manipulates.		
When to watch this video: End of Topic 1		

<p>Topic 2 - Introducing to GNU Image Manipulation Program GIMP</p>	<p>https://youtu.be/UCYWYjnM-do</p>	
<p>Overview of the video: Introduces the GNU Image Manipulation Program or GIMP, as a computer program that used for editing, creating and manipulating digital images. It will also to introduce the interface and work space that use for process in digital imaging.</p>		
<p>When to watch this video: End of Topic 2</p>		
<p>Topic 3 - Tools Function and Layers</p>	<p>https://youtu.be/qfZo6g3hb3o</p>	
<p>Overview of the video: Focuses on the tools and features that provided in the GIMP software. Its explain that each tool consist in the software plays a role as an agent acting on editing and manipulating images.</p>		
<p>When to watch this video: End of Topic 3</p>		

Topic 4 - File Format and Sizes	https://youtu.be/F-pF92s3y58	
<p>Overview of the video: Discusses on the GIMP software on how they manage files and the data contained therein with the suitable file format. Brief understanding between size and resolution images involves which reflect the quality of the images and how to save files in a number of different formats</p>		
<p>When to watch this video: End of Topic 4</p>		
Topic 5 - Simple Image Changes	https://youtu.be/2Y5aCNweyrg	
<p>Overview of the video: Focuses on the GIMP's is used in repairing an imperfection of an image which is included the retouching and colour corrections. Besides that, brief explanation about the process involves in the making of image manipulation and the suitable tools to edit and modify images</p>		
<p>When to watch this video: End of Topic 5</p>		

Topic 6 - Combining Text with Image	https://youtu.be/XIhw556ZKBs	
<p>Overview of the video: Introduces learners on how to combine text with images. There is an explanation on how to identify the function the text before the process combining with image begin.</p>		
<p>When to watch this video: End of Topic 6</p>		
Topic 7 - Drawing and Painting Tools Part 1	https://youtu.be/UcQ8QFFI_n8	
<p>Overview of the video: Describes the use of elements drawing and painting tools as powerful tools in developing image creation. The elements of drawing consist of shapes and path which can be used in different drawing style to make creative images.</p>		
<p>When to watch this video: End of Sub Topic – 7. 1 Drawing tool</p>		

<p>Topic 7 - Drawing and Painting Tools Part 2</p>	<p>https://youtu.be/jUCiQLB3Qe0</p>	
<p>Overview of the video: This topic also shows the ways to make beautiful images and objects by using the best painting tools available in GIMP. Furthermore, the image that created even after finishing adjustments can still be made on it.</p>		
<p>When to watch this video: End of Sub Topic – 7. 2 Painting tool</p>		
<p>Topic 8 - Effects and Filters</p>	<p>https://youtu.be/WXVDWcU9PyM</p>	
<p>Overview of the video: A variety of effects and filters consist in the software and each of it has their own specialty to give a beautiful effect to the image. In a nutshell, effects and filters allows users to modify an image through programs that has flexible adjustments.</p>		
<p>When to watch this video: End of Topic 8</p>		

Topic 9 - Advanced Techniques	https://youtu.be/v6r3RKsRIBI	
<p>Overview of the video: Introduces the basic advanced technique in an easy way to create a stunning image. In this topic learners learn about how to use those functions in more advanced techniques in order to create amazing visual effects.</p>		
<p>When to watch this video: End of Topic 9</p>		
Topic 10 - Preparing Images for Web	https://youtu.be/_gaF2Iy-Xs0	
<p>Overview of the video: Discusses GIMP (GNU Image Manipulation Program) is very formidable software that allows various images related tasks such as preparing images to be used for website purposes at no value, alongside an open-source community that contributes each other across all platforms.</p>		
<p>When to watch this video: End of Topic 10</p>
