

# Success Factors in DFL in TVET

Alison Mead Richardson

# Why go flexible?

## Because we want to ...

- accommodate different student populations i.e. increase access
- promote equity
- make the vision and mission statement operational
- make more efficient use of space and time
- encourage active rather than passive learning
- promote ICT skills in teachers and learners
- promote the development of independent learning

# Vision & mission

- The starting point for all planning
- Guide our thinking and planning
- Made operational in your planning for programme delivery
- Tells everyone (inside and outside the institution) what you are all about

# Example Vision and Mission

To be a college of excellence known for its *innovative* and *flexible* approaches producing competitive, skilled professionals

To provide quality, *flexible*, lifelong technical and vocational education creating competent and *innovative* individuals

# Who benefits?

- Learners
  - Meeting their needs
- Institution
  - Developing teachers' skills, meeting their mandate
- Ministry
  - Increasing access, improving quality
- Country
  - Meeting training needs for development
